Markup supports **bold**, *italic*, and **even mixed markup**.

Escape \* with \\* and \_ with \\_ in markup.

And now also color , <sub>subscript</sub> and <sup>superscript</sup>.

You can alternate the position and thickness of an underline, so you may also use this to ~~strike through~~ or blacken ██████ out

Also, you can do all that indentation stuff much easier with markup, e.g. simple indentation  
At vero eos et accusam

And end the indentation. Now a list:

- This is a list item
- Another list item
  - » A sub list item
- And yet another one

Even enumeration is supported:

1. This is a list item
2. Another list item
  - a) A sub list item
3. And yet another one

And you can customize it:

- I -> This is a list item
- II -> Another list item
  - a ~ A sub list item
- III -> And yet another one
